# 2018

## INTERIOR SYSTEMS DRAG RACE

Congratulations to Andrew Jeffery (Local 32) of Niehaus Building Services (drywall) and Josh Landis (Local 1310) of FSI (flooring) on winning the regional council's Interior Systems Drag Race.

Both received \$500 and will compete at the UBC regional competition in Indianapolis for the chance to win another \$2,500 and go on to the national drag race in Las Vegas, where they could win the \$5,000 grand prize.

*Other contestants were Nick Deters (Local 1310), Neal Dickherber (Local 32) and Doug Dunnegan (Local 1310)*

---

*L-R: Jeffery, Al Bond, Landis*

Staying focused in the face of adversity is an important skill to have. It keeps you from getting distracted and losing sight of the big picture. Usually, when someone is throwing road blocks your way, that's exactly what they're trying to do – get you distracted and off your game.

From the White House to the statehouse, hardworking people like us have a lot of reasons these days to get distracted. But now more than ever, it's critical that we remain focused and united.

This year, Missouri voters will have the opportunity to repeal so-called "Right to Work" by **voting NO on Proposition A**.

It doesn't matter if you live in Missouri, Kansas or Illinois. The future of our Council is at stake. The fight in Missouri to repeal "Right to Work" will have consequences for all working families, even beyond state lines.

**Prop A will drive down wages** for working families, making it harder to make ends meet.

**Proposition A will cost us jobs** by creating unnecessary barriers for large, private sector employers—like UPS, Anheuser-Busch and Boeing—to negotiate with their workers and effectively manage their businesses. It's bad for workers, and it's bad for business.

In "Right to Work" states, rates of workplace deaths are an astounding 58 percent higher. By voting NO on Prop A, we'll reject fewer health and safety protections.

Ultimately, Proposition A is not what it seems. Don't trust it. It weakens unions and would force Missouri workers to accept lower wages and benefits, and broadens the gap between working families and wealthy CEOs.

So, how can you help make sure we win? It's simple: Make sure everyone you know is prepared to **vote NO on Prop A** this year. Make sure their friends know, too. You can also sign up to receive updates from the campaign at [VoteNoOnPropA.org](http://VoteNoOnPropA.org) and connect on Facebook and Twitter @VoteNoOnPropA.

Thanks to the hard work of more than 310,000 Missourians who signed the petition to get our repeal on the ballot, we have the chance to defeat this harmful legislation.

We're in the fight of our lives to defend your way of life and your family's future. It's going to take all of us to win. Thank you for your commitment to making sure all Missourians know to vote NO on Prop A.

From Cape Girardeau to St. Joseph, our army is building.

The **Vote No on Prop A** campaign to repeal so-called “Right to Work” in Missouri is in high gear! Informational meetings have been held in more than a dozen locations around Missouri and thousands joined us for the Carpenters’ most recent telephone town hall in March.

**Voting NO on Prop A** is crucial to the future of the Carpenters Union and the way of life for all of Missouri’s working families. Prop A will drive down wages and cost us jobs. It’s up to us to win this battle by voting **NO on Prop A**.

How can YOU help? Spread the word by sharing news about the campaign with your friends and family on Facebook and Twitter. Sign up for campaign updates by visiting:  
[www.VoteNoOnPropA.org](http://www.VoteNoOnPropA.org).

Stay informed and watch for the latest updates.

# MENTOR

## *It's Not Just a Buzzword*

*Top: Representative Paul Higgins teaches mentoring techniques to carpenters from BAM Contracting.  
Below: Local 978 hosts a mentoring night for journeymen, apprentices and retirees.*

t their peak, unions claimed nearly one third of all people in the workforce. In those booming days few union leaders concerned themselves with recruitment programs or making their locals friendly and welcoming to outsiders. When the fish are biting, there's less need for bait.

In the 21st century, however, labor unions no longer have that luxury. Thriving into the decades ahead will mean cultivating new blood and preparing them for the demands of the job.

Mentoring young talent has become a priority for both the UBC and our regional council.

Seventy percent of Fortune 500 companies now report some type of mentoring program for new employees. To keep valued recruits from jumping ship to the competition, they promote these programs as a company perk. The payoff for good mentoring programs is well documented. Rookies who have been coached by energetic leaders tend to stick around longer, feel a stronger connection to the organization and have a more positive work attitude.

"It's not just a buzzword anymore," CRC representative Paul Higgins said. "We're finding that our contractors are already creating their own mentoring programs and we're just helping them accentuate that by giving them the tools they need to be successful."

Higgins and outreach specialist RJ Catizon have created a two-hour mentoring workshop, teaching

***"The mentoring program has helped me network and feel part of the brotherhood in a way that these veteran carpenters not only care about the organization, but me as a person, both professionally and personally."***

***-Taylor Poole, 3rd year apprentice, Local 978***

contractors and our members how to improve cooperation on the job, communicate with today's Millennials and resolve disputes that can slow down work.

While this might sound a bit too "touchy-feely" for grizzled, seasoned carpenters, the fact is that America's workforce is changing and new approaches are necessary to stay in the game.

Dan White (Local 97) attended a mentoring workshop organized for employees of BAM Contracting. He remembers the attitude young apprentices typically encountered on job sites when he started his career. "It was tough until you earned their respect. It was hard to prove yourself. You were never smart enough, never good enough," he said.

Some older carpenters say it was common to have a ladder or tools thrown at them whenever they did something the wrong way. While that generation just "sucked it up," today's young men and women are more likely to just walk away.

"That was a different era," BAM owner Brian Murphy said. "These kids today don't want to hear that

kind of stuff. They are not going to put up with it and they probably shouldn't."

Murphy said the younger workforce wants to know what an employer can do for them and they want to feel that they are a valued part of the team. They also have options when it comes to jobs and won't think twice about jumping to another employer who is offering all the things they want.

But, Murphy added, this generation is whip-smart and willing to work hard if they see something worth working hard for. "This is where the talent is now and we need them desperately, so we've got to figure out how to communicate and motivate them. That's what all this training and mentoring is about."

In Springfield, Missouri, Local 978 is enthusiastically jumping on the mentoring bandwagon and their monthly meetings are drawing a sizable turnout. Using flyers, word of mouth and Facebook, 978's mentoring committee has been able to get members interested and invested in the program. They have created a guide book, organized barbecues and developed instructional exercises so journeymen can spend

time teaching apprentices tricks of the trade. Committee secretary Dan Montgomery said the key to a good mentoring program is letting it grow organically.

"We're not trying to control it. We're letting it be grassroots where anybody and everybody's opinion can be addressed and that's what the mentoring meetings are all about," Montgomery said. "My advice is meet with as many members as you can, include everybody and listen very carefully to all the feedback you get."

At a time when labor unions are fending off political attacks and fighting for survival, recruiting and retaining new members may be more important now than ever.

And it comes as generational difference are greater than they have been in the past. Relating to young workers, speaking their language and keeping them motivated is the new challenge.

"If we don't, we're going to lose everything we've worked for," White said. "The generation coming up is going to be the one taking care of us."

*For more information on your local's mentoring program, email us at [info@carpdc.org](mailto:info@carpdc.org)*

# LIFE'S CALLING

Some Teens are Questioning the Value of an Expensive College Degree

**F**rancis Howell North High School senior Charles Brooks is looking for a career in the skilled trades. Unfortunately, he has been in the minority.

Despite the growing demand, abundance of jobs and better-than-average pay, too few teenagers have historically chosen to work with their hands.

"You can go to a four-year college like your parents want you to, but you can actually be more successful than a person who did that and paid all that money," Brooks said at a recent career expo organized by the

Carpenters for high schoolers in the St. Charles County area. "I'm going to get paid to get trained and earn an associate's degree. It doesn't get any better than that."

Several hundred sophomores, juniors and seniors attended the day-long Construction Industry Expo, held at the Carpenters training center in Wentzville. Other trades taking part included bricklayers, cement masons, iron workers, laborers and painters.

With so many baby boomers hitting retirement age, experts are sounding the alarm over the scarcity of skilled tradespeople

**Troy Buchanan High School sophomore Hayden Iborg:** “I did concrete and lawn mowing over the summer, just trying out different things. I don’t really like school and never wanted to go to college. I think I can do something like this and make a pretty good living.”

ready to take their place. According to the latest Manpower job shortage survey, skilled trades rank first among most-needed and hardest to fill jobs. This is the seventh consecutive year that the trades have topped Manpower’s list.

One obstacle standing in the way is parents who hang onto the belief that a college degree is necessary in order for their children to be successful.

Brook Prestidge, career counselor for the Francis Howell School District, said that is a mindset she and her fellow counselors continue to battle against. “For so long we were told you have to go to college to get a job, that’s the only way. But the reality is that a lot of students are graduating college without a job, just a lot of debt,” she said.

### The Skills Gap

The focus on college prep has been detrimental to vocational training programs, which were once common in American schools. Many districts dropped shop class from their curricula long ago.

Some experts blame the No Child Left Behind Act, which prioritized math, science, English and academic testing over other studies like arts and vocational education. Those experts argue that we now have a widening skills gap and a disconnect between what schools are teaching and what kinds of jobs are available and needed.

Carpenters training instructor and outreach specialist, RJ Catizon, said career expos are a good way to dispel the myth about college degrees. “We do get a lot of resistance. There are school counselors who do not discuss careers in the trades because of their own opinions and thoughts, but that’s a big disservice to the kids.”

According to the Bureau of Labor Statistics, almost 40 percent of students who begin four-year college programs don’t finish, leaving them with a lot of wasted time, wasted money and a student loan debt they’ll be paying off for years.

Last year, Colorado passed a law requiring all public school counselors to inform their students about careers options in skilled labor and the military. The sponsor of that bill, an owner of an excavation company, said his goal is to reintroduce skilled trades into Colorado’s high schools and help the state fill its 60,000 trades jobs.

No one has to force Joey Pietzman to talk about skilled labor with his students. The construction technology instructor at Troy Buchanan High School brought a busload of kids to the expo, knowing that college is not in everyone’s future.

“Students are getting more open to alternatives,” Pietzman said. “They see someone driving a nice, new truck and say ‘what does that guy do for a living?’ I tell them he’s probably a carpenter or in one of the other trades.”

This was the first career expo for the training center in Wentzville. Catizon and fellow organizer Paul Higgins were overwhelmed with the turnout and say they are already planning the next one. ■

# VROOM

***We're Putting it in Gear and Getting the Job Done.***

Car shopping is as comfy as a Sunday drive at St. Louis landmark Sunset Ford, and the Carpenters can take some of the credit for that.

Founded in 1912, the family-run dealership has seen healthy growth over the years, but also the unavoidable problems that go along with it.

"We have eight advisors in our service department and one of them has been working off of a folding table, so we really needed more space for the employees," operations manager Justin Heutel said. He is the great-great-grandson of founder Peters S. Heutel.

In the competitive car industry, customer service is king and making the buying experience as pleasant as possible is what builds loyalty and repeat customers.

Sunset is putting nearly \$1 million into its renovation, much of it going toward doubling the size of their customer lounge. It will feature a kids' playroom, food and vending area with charging stations for today's cell phones, iPads and other electronic devices we can't seem to live without.

Sunset started as a gas station and repair shop when the Model T was just about the only car on the road. It became a Ford dealership in 1916. It's now run by the fourth and fifth generations of the founder's family. Locals have jokingly refer to it as "Heutelville" because so many Heutel decedents owned property and lived around the dealership.

The family business has thrived despite two world wars, the Great Depression, gasoline shortages and competition from foreign car makers.

Today, Sunset sells about 2,500 new and used vehicles every year.

Carpenter electricians from Reinhold Electric won the bid for all the electrical work, lighting installation and data runs going into the dealership's new, remodeled look.

"Reinhold has been very professional, friendly and a great company to work with," Heutel said. "It's hard to find good people and when you got them you don't want to lose them."

# LIVING THE DREAM

Of all the houses under construction in St. Charles County one special home stands out.

The 2018 St. Jude Dream Home, benefiting the famed children's research hospital, will give one lucky family the payoff of a lifetime, while helping save kids facing life-threatening illness.

Volunteer carpenters started framing the house under a cold, snowy sky on a February weekend in O'Fallon.

"We've done the St. Jude home for several years now and we'll keep doing it as long as they need us. It's a great group of people to work with and, of course, a great cause," Al Bond said.

More than 40 crew members from Cheltenham Construction Services volunteered.

Built by Payne Family Homes with donated materials and labor, this year's 3,700 square-foot house, with a value estimated at more than \$400,000, features four bedrooms, a second floor eagle's nest and a finished lower level. It is located in the Legends Pointe subdivision currently under construction off Old Highway N.

Dozens of cities participate in the Dream Home giveaway, which sells \$100 tickets for the chance to win the house or other prizes. It is St. Jude's largest and most recognized annual fundraiser.

Founded by actor Danny Thomas in 1962, the Memphis hospital treats 7,500 children each year, most suffering

from cancer. Families never receive a bill from St. Jude for treatment, travel, housing or food. In almost 30 years, the hospital has given away more than 450 houses and raised \$370 million for medical care and research.

"It's an amazing cause and we always say that if you're able to do something then you should do something," Eva Fryar, Payne's vice president of construction operations said. This marks the fifth year Payne has partnered with St. Jude Dream Home. "It's given away in September and we start planning for the next house in November. We have just two months off before we start planning, breaking ground and doing it all over again," Fryar said.

This year's build is happening under a cloud of uncertainty for the Carpenters and its signatory contractors. Missouri voters have the opportunity to repeal so-called "Right to Work" this year by voting NO on Prop A. Prop A would weaken unions and force Missouri workers to accept lower wages and benefits.

"In other parts of the country that are 'Right to Work' they don't get the whole Dream Home built for free because they can't get a group like this together," Vic Hoerstkamp, president of Cheltenham Construction Services said. "Our union carpenters out here today are part of a team, they make a good living and so they don't mind volunteering their time like this."

Tickets for last year's giveaway in Cottleville, Missouri sold out and raised more than \$1 million.

17,800 for training and meeting space

Lab space: 8,000

Classroom: 1,000

# OPEN FOR BUSINESS

*Work Ready Communities  
bring companies & jobs.*

*County Executive Steve Stenger unveils St. Louis' Work Ready Community status at a joint news conference with area labor unions. Below: CRC training director Dr. John Gaal with Stenger.*

St. Louis County believes it has the kind of skilled, competitive workforce that can lure major employers, and now it has official recognition to back that up.

More than 9,700 county residents have been tested and earned a National Career Readiness Certificate. Administered by ACT, the same folks who conduct college entrance exams, the Work Ready status means St. Louis can assure companies that they will be able to find the workers they need.

"In a time of low unemployment it becomes even more important that you have a highly skilled workforce because there is great competition among jurisdictions for where business are going to locate and remain," County Executive Steve Stenger said. "It gives employers confidence that our workforce is quite literally ready to perform the tasks that are required for the particular jobs that they would like to bring to our region."

St. Louis County is the largest U.S. jurisdiction so far to be recognized as an official Work Ready Community.

Employers often rule out locating to a new city if they fear that sufficient workers can't be found there. A plentiful pool

of construction professionals is also important in order to build new headquarters, buildings, infrastructure, etc.

St. Louis area trade unions participated in the certification process for the county.

More than 300 employers have officially recognized the Work Ready certificate, including Boeing and Sprint. Getting certified took more than two years, and in order to maintain its status, St. Louis County must undergo recertification every two years.

Economic development officials say they will be using the designation to promote the St. Louis region to companies that are looking to relocate or expand. It will help, they believe, to place St. Louis ahead of other cities that may not have a large reserve of available, skilled workers.

Missouri has 51 certified Work Ready counties.

Thank you to the 400 people who attended the 13th Annual Mouse Racing & Rodent Roulette. You helped us raise \$13,400 for the Carpenters' Scholarship Fund.

Special thanks to Matt Taetz, Local 1596 and Dzevad Muratovic, Local 1596 with Best Mouse Race.

# FULL

# AHEAD

Only 20 percent of girls choose math, science or skilled trade professions. At a recent STEAM (Science, Technology, Engineering, Arts and Math) event held for seventh grade girls, the regional council explained the options open to women in carpentry.

Girls are no less capable of working with their hands, but they often *feel* less capable, partly due to stereotyping and adults who never bother to discuss these career paths with them.

Since STEAM jobs tend to be higher paid, the lack of women in the field is contributing to the gender salary gap.

Susan Byard brought her daughter to the event because the seventh-grader at Parkway Northeast Middle School is already expressing an interest in a technology career. "It's in middle school where they start to separate from the boys and figure out which jobs are boys' jobs and which ones are girls'.

I think anything you can do to expose them to ideas, instead of the preconceived notions of carpentry or engineering, is a good thing," she said.

Research has shown that science achievement gaps emerge as early as kindergarten and continue all through grade school. In a sort of self-fulfilling prophecy, many girls perform poorly in STEAM exercises when teachers perceive them to be less competent than the boys.

Experts say combating the problem requires a change in thinking —don't speak down to girls when talking about technology or fixing things around the house. Visit zoos, museums, caves, aquariums and similar attractions to expose them to a variety of interests and potential careers.

Above all, let your daughters know that no career goal is out of reach.

# Len Toenjes, President

Associated General Contractors

## Missouri Cannot Afford to Wait

The buzzword of the last several weeks is “infrastructure.” At the national level, President Trump offered his proposal largely based on state, local, and private investment. The U.S. Chamber of Commerce has called for a 25 cent per gallon gasoline tax increase to keep the federal Highway Trust Fund solvent. In Missouri, no less than 24 bills have been introduced in the House and Senate with just as many differing approaches to funding the state’s infrastructure and transportation system. They are all slogging through the various steps of the legislative process needed to bring this issue to some decision. No less than seven different initiative petition proposals also have been filed with the state.

Late in 2017, the joint legislative 21st Century Task Force traversed Missouri with a series of public hearings concerning infrastructure and transportation needs. At their first meeting, MoDOT Director Patrick McKenna appeared with all of the task force studies that have been completed since the most recent increase in infrastructure funding in Missouri. It was a very large stack.

Missouri has far too many studies and far too little action. It’s our policymakers’ inaction that is costing our state jobs, economic development and a clear pathway forward to revitalize Missouri. Whenever I speak with these elected officials, they concur that there are great needs but little public support for increasing user fees.

All of this brings to mind a simple question: How bad does it have to get before action is taken?

For example, MoDOT has plans to make seriously needed repairs to I-270 in north St. Louis county. This \$750,000,000 project is needed to address 50- year -old roads that are now a critical link in a freight network that can bring economic development to St. Louis and to the state as a whole

Available funding for this project is less than 25 percent of the cost, so the project waits. This is just one example of the unfunded needs across our state.

Missouri cannot afford to wait for the federal government to bail us out. We already receive over 65 percent of our current transportation funds from the Highway Trust Fund. MoDOT is running a very effective department with the limited and shrinking funds they do have.

The Missouri Legislature needs to do the job they are elected to do, which is make a decision, show leadership and allow the citizens of Missouri the opportunity to vote on a method to address this shortfall. A more effective approach to funding these needs (which by the way are moving forward in many other states) can only lead to a stronger economy and an improved quality of life so important to bringing jobs and businesses into our state.

It’s time for our legislators to act and let the people decide. Inaction and lack of public support is merely leading to more stacks of paper defining our growing needs and more years of Missouri falling behind.

# COMING HOME

*Thanks to: John Mormann, Andrew Hoegemeier, Robert Payne, Zach Logan, Jacob Buerck, James Nolting and Vince Bandermann (not pictured).*

Tiny houses can solve a big problem.

A few years ago they started popping up as a transitional housing solution for homeless veterans.

Today, there are dozens of tiny house “villages” across America.

We’ve built this house for a veterans charity that will put it to good use.

These specialized communities of tiny homes provide on-site services, safe, stable housing and address the underlying cause of veteran homelessness.

## OPIOIDS

Continuing our education and training on the opioid crisis, the regional council recently hosted Robert Riley, co-founder of the Missouri Network for Opiate Reform and Recovery. Manual laborers are at high risk for addiction to dangerous pain killers, which Riley says are commonly over-prescribed.

“The CDC guidelines say doctors should not prescribe longer than three days but we’re seeing kids getting prescribed 90 Vicodin when they have their wisdom teeth taken out. Opioids are being used to treat longterm chronic pain even though that’s not what they’re designed for. Your members really need to be careful about what they are taking for pain and for how long.”

WE BEG**

Safety Director Barry Stelzer (left) and Southern Illinois Training Coordinator Alex Gromada (right) signed an OSHA Alliance Agreement at the annual SafetyCon conference in Edwardsville. Under the agreement, the Carpenters and OSHA will work hand-in-hand to teach and promote safety training for our members and the broader construction community.

Cindy Frank (Local 945) explains carpentry career opportunities to students at Russellville High School in Cole County, Missouri.

Closing out the 2018 Women in Construction Week, union women from around the state met with elected officials at the Missouri State Capitol in Jefferson City discussing women's issues such as equal pay, and paycheck deception.

Congrats to the UBC's newest Gold Card member. Tom Heinsz, a former CRC representative, earned the honor for 50 years of service to the Carpenters Union. *(Left to right: CRC representatives Mike Swyers, Chuck Williamson, Heinsz and Paul Higgins.)*

## SNAPSHOTS

Local 1127 representing us well at Kansas City's St. Patrick's Day parade.

Thank you to everyone who chipped in with this year's Local 1310 poker tournament, benefiting the CRC Scholarship Fund. It's an annual tradition, a great night of fun and a big boost for a worthy cause (we raised \$3,774).

There is no cost to the CRC member, employed by a contributing union contractor, who properly registers, attends and completes courses (seated or online.) \*Indicates courses that meet 8-hour safety requirement.

## Jefferson City Carpenters Joint Apprenticeship Program

Introducing the new  
Carpenters mobile app.

On the go. On your phone.

Always there.

Start here to get information on  
professional carpentry and the  
companies who hire us

## TRAINING

The road to becoming a journey-level carpenter begins with our nationally-recognized apprenticeship program. Your education will consist of on-the-job training combined with classroom and shop instruction. You'll work for a union contractor while attending classes at one of our state of the art training centers. As you progress, your income will
