Proposed services apply to eligible members and their dependents (spouses and children over the age of 2).

**Primary/Urgent Care**

Primary care will include health promotion, disease prevention, health maintenance, counseling, patient education, diagnosis and treatment of acute and chronic illnesses within the licensure and qualification level of the on-site Cerner staff. Primary care is performed and managed by a Physician, Nurse Practitioner or Physician Assistant often collaborating with other health professionals, and utilizing consultation or referral as appropriate for more complex and time-intensive diagnostic procedures and/or treatments.

First aid services within the licensure and qualification level of the on-site Cerner staff

General physical examinations
- Annual
- DOT
- School/Sports
- Return to Work

Coordination of referrals for specialist visits and/or additional diagnostics

Chronic condition management

Patient education regarding illness, medications, chronic conditions, wellness, disease awareness, and preventive care

Vaccination program for Employees and Dependents of all ages

HIV testing but not treatment of HIV/AIDS

Initial screening and treatment of mild behavior health conditions but not including ongoing management of moderate or severe anxiety or other psychiatric services

**Lab Services**

- Urinalysis
- Blood Draw
- Quick Tests – Strep, Pregnancy, Influenza

**Video Visits**

Provide the ability for an established patient to complete a virtual visit using technology within the HealtheLife portal.

Schedule a visit appointment electronically

Engage with the established patient to review the established patient’s symptoms and determine whether a treatment plan can be initiated or completed via a virtual visit.

Virtual visits are only appropriate for illnesses and injuries such as the following symptoms:
- Conjunctivitis
- Sinus conditions
- Simple urinary tract infection
- High cholesterol follow up
- High blood pressure follow up
- Upset stomach
- Sore throat
- Rhinitis
- Simple skin rash
- Back pain

Any condition where an in-person exam is required will not utilize a video visit due to potential severe symptoms, certain protocol-driven procedures, or the need for aggressive interventions. Medical emergency patients should go to the emergency room or call 911.

**Health & Wellness**

Support/Coordinate/Participate in Client health fairs

Preventive Screenings such as blood pressure, mammograms, skin cancer, etc.
